

BCT	Beam Current Transformer
BCTFI	fast beam current transformer
CCR	CERN Control Room
cfc-ccr-ctpps	The front end (a PC running SC5 linux) where is installed the CTRI that logs the PPS coming from the PolarRx2e
cfc-hca4-saos12	The front end where we do the BCT logging, it has a CTRI and a DC110
CS4000	Cesium clock from Symmetricon
CTRI	Control Timer Receiver, PCI format
CTSUN	generate 40MHz and 1PPS with the 10MHz and 1PPS from the XLi
CNGS	CERN neutrinos to Gran Sasso
DC110	Oscilloscope module from Acquiris
HCA442	control room of the CNGS
PolarRx2e	GPS receiver from Septentrio
SPS	Super Proton Synchrotron
Xli	GPS receiver from Symmetricon
